Desktop Application

PROJECTS

Client Management System, .Net MVC

Jul 2020 – Oct 2020

- Built a Client Management System(CMS) for a finance company named “ALLWYN Finserve” with other 2 developers.
- The Software includes various modules for employees to manage clients' data.

Personal Manager, C#

- Building a Windows Form Application named “Personal Manager” . It's used to manage personal things like Documents Id Numbers, Social media logins, Banking details and Other things securely.
- You just need to remember single password that is used to access the application then rest will be taken care of.

Web Resume, HTML, CSS, Javascript

- Developed a Web Resume as a part of Web Technology subject's Self Study.

Scripty, Python

- Built an AI based writing assistant using python Libraries like TKinter, Tesseract, etc. as a part of Smart Gujarat Hackathon-2019 in which we are nominated for Grand Finale which is pending.
- I'm a Front-end Developer in Python using TKinter.
